

HEADWORN MICROPHONE

**HM-22
Q-HM-22**

DESCRIPTION:

TOA's new Headworn Microphone is a high quality headband microphone, which not only claims to be one of the smallest but also one of the lightest headband microphones on the planet, has been designed to be worn around the head and to be hidden discreetly under the hair.

The headband is engineered from a hard wearing nylon composite, which has been specially selected to withstand the most robust use and yet can be adjustable to fit any user's head and ear shape.

The high quality microphone optimized for speech and vocals, is mounted on a boom that can be bent into shape to allow for optimum sound quality.

A small membrane is inserted into the capsule housing which protects the capsule from moisture, make-up and any other dirt and can be effectively replaced to allow the microphone to perform consistently at its best.

HM-22: Compatible with *TOA's Trantec S5.5 UHF Microphone System*. This Headworn Microphone is available in beige and uses a 4 pin Mini XLR connector.

Q-HM-22: Compatible with *TOA's 5000 Series UHF Microphone System*. This fitted headworn microphone is available in beige and features a 3.5mm jack plug.

SPECIFICATIONS:

Technical Specifications	HM-22 (S5 Series)	Q-HM-22 (5000 Series)
Polar Pattern:	Omnidirectional	
Transducer Type:	Electret condenser	
Nominal Impedance:	4,400ohms	
Max. SPL:	>120 dB	
Operating Voltage:	2-10 volts min/max	
Current Consumption:	14-25uA min/max	
Frequency Response:	40Hz – 18 kHz, ±3dB	
Cable Length:	1200mm	
Colour:	Beige	
Connector:	4 pin Mini XLR Connector	3.5mm Connector
