

## MacDonald Island Park, Fort McMurray, AB

Located in the Wood Buffalo Region, MacDonald Island Park is Canada's largest community recreation, leisure and social centre. The Regional Recreational Corporation of Wood Buffalo, a not-for-profit corporation, operates the island.

## Products Used

- H-3: 2-Way Wall Mount Speaker System
- F-2000BT: Wide-dispersion Speaker System

## Purpose

MacDonald Island Park wanted to create an arena sounding auditory experience. They required an audio system capable of producing intelligible sound while keeping the speakers inconspicuous.

## Challenge

Being a recreation centre; hallways, sports areas, bleachers and the pool area all need to be taken into consideration. Such vast spaces require the minimization of reverberation and special equipment such as downward directional speakers.

## Solution

Working with the installer, TOA Canada carefully selected the most effective equipment to be installed to create an atmosphere of intelligible sound and balanced coverage.

## Feedback

The customer was very satisfied with the sheer quality of sound and the way TOA products were used effectively throughout their complex.

## About TOA Canada Corporation

TOA Corporation was founded in Kobe, Japan over 80 years ago. TOA operates in over 100 countries worldwide, with manufacturing facilities found in nearly every major market area. These facilities have a reputation for precision design and fabrication, resulting in a proven track record of TOA product reliability.
