

Active Seniors Enjoy Their AV System through Entertainment

L'Accueil Colombien, a Seniors Residence in the Saint Boniface district of Winnipeg, believes that their residents should enjoy their entertainment and free time, and has provided the residents with an AV system, that sounds great and functions well. The entertainment room at this residence has very high ceilings and is a larger open concept room. Providing high quality sound for the residents was very important to L'Accueil Colombien.

The entertainment room has activities running all day long. The AV system encompasses a cable TV receiver so the residents can enjoy viewing sporting events including the Olympics and curling. During the day, the L'Accueil Colombien plays a French radio station through the audio system. Three nights a week, the residents at L'Accueil Colombien enjoy their Wii fitness nights so much that there is often a long line up to register to play games

including boxing, bowling and golf.

This spirited and lively group of residents enjoys the sounds that are played through two HX-5W (Variable Angle Speakers) clusters, complimented with a subwoofer (FB-120W). The entertainment system makes their days more enjoyable and fun.
