

Centre de Santé et de Services Sociaux de Manicouagan, Baie-Comeau, QC
(Hospital)

Products Used

- N-8033MS Flush-Mount Master Station
- N-8000EX IP Network Intercom Exchange

Purpose

The surgery block at Centre de Santé et de Services Sociaux de Manicouagan required a hands-free footswitch operated communications system.

Challenge

Working in a cleanroom and hands-free environment, it's important for the doctors and nurses to have products that fit the specifications.

Solution

TOA recommended components from their IP Intercom Product line, including their Flush Mount Master Stations (N-8033MS). These master stations are manufactured just for hospitals. They are IP-65 rated, chemical resistant for use in industrial and harsh environments and offer an input for use with footswitch dialling.

Feedback

The surgery block at the hospital is delighted with their communications system. Now they can communicate with other areas within the hospital through a reliable hands free operation.

About TOA Canada Corporation

TOA Corporation was founded in Kobe, Japan over 80 years ago. TOA operates in over 100 countries worldwide, with manufacturing facilities found in nearly every major market area.
