

Centre hospitalier universitaire Sainte-Justine, Montréal, QC

The Centre hospitalier universitaire Sainte-Justine is a paediatric and obstetric university health centre affiliated with the Université de Montréal, located in Montreal, Quebec.

Products Used

- N-8000EX: IP Network Intercom Exchange
- N-8050DS: Door Station
- N-8600MS: IP Multifunctional Master Station

Purpose

The hospital sought a reliable Intercom System to provide communications and security between the parking lots and building entrances.

Challenge

The hospital underwent an expansion and renovation and required an Intercom System to provide communications and security between the parking lots and building entrances. The hospital needed to be able to communicate with people in the parking lot, provide public address paging and door access to the facility and parking.

Solution

TOA's IP Intercom System was installed to provide a networked (LAN/WAN) Intercom System throughout the parking lots to the hospital. Public address paging and hands free conversation is possible via the Intercom System. The system remotely controls electronic door locks providing security for the hospital.

Feedback

The customer was very happy with performance of TOA's intercom system. The system provides the communication and security that the hospital was looking for.

About TOA Canada Corporation

TOA Corporation was founded in Kobe, Japan over 80 years ago. TOA operates in over 100 countries worldwide, with manufacturing facilities found in nearly every major market area. These facilities have a reputation for precision design and fabrication, resulting in a proven track record of TOA product reliability.

TOA Canada Corporation was formed in 1990 as a complete sound solutions provider, specializing in commercial audio, including, public address, voice communications, voice evacuation and emergency paging requirements.
