

## Four Points Sheraton, Toronto, ON

Four Points by Sheraton Toronto Airport is newly renovated and conveniently located across from Toronto Pearson International Airport. With over 10,000 square feet of flexible meeting space, we can host any special event, including corporate meetings, training seminars, conference or trade shows, church socials, college and military reunions, weddings and rehearsal dinners.

## Products Used

- F-2322C Wide-Dispersion Ceiling Speaker
- P-912MK2 Power Amplifier
- BG-235 Mixer Amplifier
- SO-MIX-T-24V Remote Mixer

## Purpose

The hotel was searching for high quality audio equipment to renovate their systems through various meeting rooms of different sizes. The current equipment was old and did not perform all the functionality that the hotel was in need of to meet the requirements of the varying demands of customers.

## Challenge

The challenge of installing was very minimal as much of the wire ring was already in place. What made the project slightly difficult was ensuring that TOA's design and selection of products provided the hotel with the functionality and sound clarity they needed in their meeting rooms.

## Solution

TOA recommended the F-2322C wide dispersion speakers that offered a greater dispersion of sound in the rooms while sounding very clear. The power mixer and mixer amplifier enhanced the strength of the speaker sound and provided the performance and versatility they needed and all of this was controlled through the wall mounted SO-MIX T 24V remote mixer.

## Feedback

The resulting new audio system was very effective and the hotel was satisfied that the equipment would now meet the needs of their events.

## About TOA Canada Corporation

TOA Corporation was founded in Kobe, Japan over 80 years ago. TOA operates in over 100 countries worldwide, with manufacturing facilities found in nearly every major market area. These facilities have a reputation for precision design and fabrication, resulting in a proven track record of TOA product reliability.
