

Halifax Stanfield International Airport, Halifax, NS

The Halifax Stanfield International Airport is Atlantic Canada's full-service airport. More than three million passengers pass through this airport each year, making it Canada's seventh largest airport.

Products Used

- N-8000: IP intercom system (various products)

Purpose

The Halifax Stanfield International Airport underwent a major terminal expansion, so they required a solution to communicate throughout the airport from the interior/exterior doors to the Security Operation Center (SOC). They decided to update and replace an existing, out of date, intercom system. The airport was looking for a complete system that included an IP Network Intercom system that could be integrated with their existing platform.

Challenge

Finding a true IP intercom system that allowed for all substations to be wired.

Solution

TOA's IP Intercom was chosen for the project because it provided straightforward communication throughout the airport; was easy to use and install; and had excellent clarity and reliability.

Feedback

TOA's IP Network Intercom System has delivered an overwhelming experience to Halifax Stanfield International Airport. In fact, when the airport welcomed the U.S. Preclearance, they again installed TOA's IP Network Intercom.

About TOA Canada Corporation

TOA Corporation was founded in Kobe, Japan over 80 years ago. TOA operates in over 100 countries worldwide, with manufacturing facilities found in nearly every major market area.
