

Northside Arena, Fredericton, NB

Located within the Willie O'Ree place it contains Two NHL-sized ice surfaces, 11 dressing rooms, offices for officials and event organizers, indoor walking track, three community rooms, canteens.

Products Used

- FB-120: Subwoofer
- DA-550: Multi-channel Digital Power Amplifiers
- D-901: Digital Modular Mixer

Purpose

To install a new PA system that worked in both arenas, but could be controlled from one place. It also needs to provide a strong clear sound.

Challenge

Designing two slightly different systems to match the different sizes of the two arenas, but having them both managed from one place and make it easy to use.

Solution

TOA recommended the combination of HX-5's speakers and FB-120 subwoofers powered by the DA-550 multi channel amplifier. This is a classic set up for many arenas.

Feedback

The client was happy with the ease of the installation and how well TOA's product is functioning in the facility. TOA provides great products and services and we enjoyed working with them.

About TOA Canada Corporation
