

Stony Plain Glenn Hall Centennial Arena, Edmonton, AB

Built in 1967, the Glenn Hall Centennial Arena is open for hockey and public skating from September through March. The Arena is named after famed NHL hockey goaltender Glenn Hall.

Products Used

- HX-7 Compact Line Array Speaker System
- FB-150B Subwoofer

Purpose

With an aging sound system, the Arena required an upgrade. They wanted speakers that provided clear and intelligible sound so the fans can easily hear the music and announcements.

Challenge

The project was pretty straight forward. Working with a local installer in Edmonton, our TOA tech team designed the installation proposal using the EASE software and recommended a speaker cluster approach.

Solution

The HX-7 line array speakers were clustered with the FB-150 subwoofer and hung from the ceiling in a precisely accurate position based on the EASE design. Together, the sound deriving from the cluster was an excellent upgrade in quality and clarity.

Feedback

The arena management team was very happy with the sound quality and how appealing the speakers from the ceiling looked. They would recommend TOA products for arena projects.

About TOA Canada Corporation

TOA Corporation was founded in Kobe, Japan over 80 years ago. TOA operates in over 100 countries worldwide, with manufacturing facilities found in nearly every major market area. These facilities have a reputation for precision design and fabrication, resulting in a proven track record of TOA product reliability.

TOA Canada Corporation was formed in 1990 as a complete sound solutions provider, specializing in commercial audio, including, public address, voice communications, voice evacuation and emergency paging requirements. TOA Canada offers complete solutions for all corporate and commercial audio communications and intercom security requirements.
