

**LEGENDARY
RELIABILITY**

Ask anyone experienced in audio. They'll tell you TOA amplifiers have a reputation for rugged reliability that's unmatched in the industry.

One look inside and you'll see why. TOA amps are engineered tough. They're assembled with the highest quality components. Then tested and retested to ensure an out-of-the-box failure rate that's virtually zero.

Ask around. If you're looking for the kind of amplifier you can install and forget, the only way to go is TOA.

SPECIFICATIONS

Output Power	BG-115: 15W RMS BG-130: 30W RMS
Frequency Response	20Hz – 20kHz (±3dB)
Inputs	Mic/Telephone Page Input Program Input Auxillary Input
Outputs	Transformer Isolated: Balanced, 4 ohm, 25V and 70V MOH: Balanced, 1W @ 8 ohm
Signal-to-Noise	Mic: 60dB Telephone, Program, Auxillary: 75dB
Power Consumption	BG-115: 50W BG-130: 90W
Dimensions WxHxD	8.27" x 3.66" x 10.87" 210mm x 93mm x 276mm
Shipping Weight	BG-115: 7.28lbs (3.3kg) BG-130: 8.60lbs (3.9kg)
Options	Single and dual rack mount kits Wall mount kit

**AMPLIFIERS
FOR PAGING
AND BACKGROUND
MUSIC**

THE SOUND ENGINEER'S CHOICE FOR PAGING AND BACKGROUND MUSIC APPLICATIONS

TODAY'S BACKGROUND music and paging installations are more complex than ever. Which means no matter where they're going—retail store, office, restaurant or warehouse—today's amplifiers must meet a variety of needs. TOA's new BG Series amplifiers offer all the

Sleek and handsome, BG Series amplifiers are half-a-rack wide, with plenty of room at the rear for wiring.

features you're looking for, and more.

Music-on-Hold (MOH) makes it easy to integrate audio into your telecommunications systems. An Auto-Mute function automatically overrides the PGM and AUX channels during paging. Upon completion of the page, it brings the PGM/AUX back up gradually, for a smooth transition between signals.

Signal, peak and power LEDs are provided on the front panel, along with independent MIC/TEL and PGM volume controls.

The back panel is straight-forward and user friendly, making installation fast and foolproof. And at half-a-rack wide, there's plenty of room to work.

Best of all, BG Series amplifiers feature that built-in rugged reliability you've come to expect from TOA—backed by a three-year, no-questions-asked warranty.

Call your TOA dealer today for data sheets, or visit us at www.toaelectronics.com.

Simple layout makes set-up easy—even for inexperienced technicians. Short-circuit protection and speaker terminal covers offer added security and help assure reliability in demanding environments.

FEATURES AT A GLANCE

15W and 30W RMS models available

Three inputs: Switchable MIC/TEL, Program (PGM), and Auxillary (AUX)

Music-on-Hold (MOH) output, adjustable from Line Level to 1W/8ohms

Versatile Auto-Mute function allows paging override of AUX/PGM without interruption of Music-on-Hold

25V, 70V and 4 ohm speaker outputs with screw-terminal connectors

3 Year Warranty

Security Caps prevent tampering with the volume controls and eliminate accidental changes to settings.
